

# IFAT Excursion to Penzing May 8, 2014

**STP Penzing – HUBER  
reduces disposal costs**

## **Sludge dewatering and drying – HUBER solutions reduce sludge volumes**

- Simple plant technology for sustainable cost reduction
- Thin sludge becomes combustible granulate

The HUBER machines and plants for sludge treatment on STP Penzing were installed two years ago.

A RoS 3Q 440 sludge dewatering press and a SRT 9 sludge dryer save the costs for previous contract dewatering. The fully automated system is really easy to operate.

Practical experience has proven that HUBER products are solutions that guarantee reliable system operation for many years.

The plant operators and municipality are very satisfied with the installed system.

*Sludge feeding to the greenhouse directly from the dewatering unit*

# Program of May 8, 2014

10:00 Departure from IFAT trade fair centre

11:00 Arrival at STP Penzing

- Welcome
- Tour of STP Penzing
- Presentation and visit of  
HUBER Solare Active Dryer SRT

12:00 Departure from STP Penzing

13:00 Arrival at IFAT trade fair centre

Participants are requested to meet at the HUBER stand before departure from Munich. Our ladies at the information desk will help you find the meeting point.

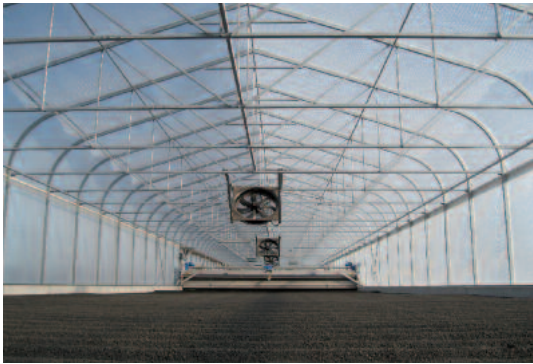

Packed lunch will be provided for all participants.

*RoS 3Q 440 dewatering thin sludge*

## Convincing benefits

Automated operation, dust-free and odour-free sludge processing, high technical reliability, and reliable product quality make the plant a showcase project.

*Greenhouse with climate control system*

*Sludge turner before sludge feeding*

# Register for the excursion to STP Penzing on May 8, 2014

Fax: 08462/201-279 or [ska@huber.de](mailto:ska@huber.de)

- ☐ I will participate.
- ☐ I will be unable to participate but would appreciate if you offered me another visit date.

The number of participants is limited. Registration will be accepted on a first-in-first-serve basis as received.
