Mechanical Fitter

We are looking to fill this permanent position to be based at our Head Office in Chippenham.

Reporting to the Operations Manager, this person will be part of a small team responsible for the assembly and testing of machinery for wastewater treatment. The role requires a skilled experienced Mechanical Fitter, used to working from mechanical engineering drawings and who is likely to come from either a machinery assembly, plant maintenance or metal fabrication background. The role requires somebody who is self-motivated, team orientated and able to demonstrate initiative and ability to work without supervision.

Your core responsibilities are:

- Complete the assigned mechanical and electrical assembly work as per workshop instructions.
- Ensure that your respective projects are completed to a satisfactory standard and within the agreed timescale and that any issues arising during the assembly work are dealt with promptly and in a professional manner, liaising with colleagues as necessary.
- Identify any non-conformities and raise Non Conformance Reports in line with the company procedures.
- Ensure that all documentation used prior to, during or resulting from the assembly work is controlled in accordance with company's quality, environmental and health and safety procedures and management system and are completed promptly.
- Ensure safe loading and unloading of machines in and out of the workshop as required.
- Ensure all tools and equipment provided by the company are properly maintained in safe working order.
- Use all required risk control measures, including personal protective equipment, at all relevant times.

Your profile:

- You will have completed an apprenticeship in a relevant technical discipline
- You will ideally hold a formal qualification e.g. ONC or equivalents in a relevant discipline
- Experience of working with waste water treatment equipment is desirable
- You will have a strong work ethic and uphold positive health & safety values
- You have good attention to detail with a focus on quality at all times
- You will ideally have had previous experience in welding and/or electrical assembly work
- You need to be able to deliver projects within tight deadlines
- You are a good communicator
- You are eligible to work in the UK

As the right candidate you will be self-motivated, demonstrate good attention to detail, team orientated, reliable with a strong sense of problem solving and ownership and be able to demonstrate initiative.

HUBER Technology's culture is built on strong values with a focus on supporting professional and personal development. HUBER Technology is proud to be IIP Gold accredited.

We offer an interesting role that provides ownership, a competitive salary and benefits package as well as sound development opportunities.

If you are interested please send your CV (as a pdf document) with a covering e-mail to hr@huber.co.uk
